# Supporting Australian farmers to grow

#### **Backing rural Australia**

As the only 100% Australian-owned specialist agricultural bank, Rural Bank was founded to provide banking services to rural and regional Australia at a time when major banks were withdrawing from these communities.

As part of the Bendigo and Adelaide Bank Group, Rural Bank's products and services are available at more than 400 locations nationally through the Bendigo Bank branch network and a dedicated team of farm finance specialists.

#### **Backing Australian communities**

Tasmanian Agribusiness Relationship Manager, James Cameron, says Rural Bank's relationship with local **Community Bank**® branches provides a local platform to help agribusinesses in Tasmania to succeed.

"The **Community Bank**<sup>®</sup> network shares our understanding of the unique needs and demands facing farming customers and communities here in Tasmania," added James.

"When you bank with Rural Bank through your local Community Bank\* branch, you'll be feeding into the prosperity of your community by supporting locally-lead projects and initiatives."

### **Farmer focused**

"Rural Bank's sole focus is to provide products and expertise that help farmers take control of their money, stay on top of challenges and grab opportunities.

"Our Tasmanian team of experienced farm finance specialists work with farmers in rural communities to develop finance solutions built around regional, seasonal and economic conditions," says James.

"Not only do we provide farmers with industry-focused commodity insights through our AgAnswers publications, but also innovative product solutions, such as our FMD Offset Account."

## **Stud History**

The Trefusis Merino Stud was formed in 1965 by Jim and Jo McEwan on Winton, Sierra Park, Valleyfield and Kenilworth bloodlines.

In 2009 the decision was made to infuse Nerstane Genetics to improve productivity through increasing body size, fleece weight and lambing percentages. Since then average Stud Ewe fleece weights have lifted to 7.0 kg plus and lambing percentages to 105% whilst maintaining a micron of 18.0. Subsequent sires have also been used from Langdene, Roseville Park and Alfoxton.

### Poll Stud

Trefusis commenced a Poll Stud in July 2017 purchasing a PP Poll Ram from Coryule Stud, Vic. for \$10,000 and semen from and Alfoxton Poll ram that sold for \$30,000 at Bendigo Ram Sale that same year. Subsequent sires and semen have been purchased from Alfoxton, Nerstane and Roseville Park. Results from these purchases are very pleasing to date.

### **Okehampton Line**

In June 2018 Trefusis purchased ewes and a Langdene Stud Sire from the Okehampton dispersal Sale. Most of these ewes were sired by a Roseville Park Ram that Okehampton and Trefusis had purchased in partnership in 2014. RP 12.2792 and his sons have been very influential within the Stud producing 4 out of the 5 winning 2018 Lionel Weatherly group at Bendigo. This Okehampton line continues today, they are very productive sheep with good frame and structure and white crimpy wools.

### **ET Program**

On an exciting note, we welcomed our first drop of Embryo Transfer lambs this year. These lambs are out of an Elite group of 12 Trefusis Stud Ewes crossed with semen from specially selected proven top sires. The ET lambs look very well at present and are showing a lot of promise. They have all had their DNA taken recently and I'm eagerly awaiting these results. The Rams from this drop will be available for Sale in 2022.

We strongly recommend a hands on and balanced approach when selecting your rams. Whilst we accept figures are important, we believe it is essential that all Rams measure up in conformation and structure. We have included Sheep Breeding Values (FBV's) to help you as a valued client in the selection of your rams. An explanation of these figures is provided on separate information sheets at the sale. Please come and see me if you have any queries regarding these figures.

# Future Directions for the Trefusis Merino Stud

Our aim at Trefusis is to continually strive to produce the best sheep we possibly can that are productive and profitable. We benchmark ourselves and are competitive against peers in the show ring at Campbell Town and the Australian Sheep and Wool Show in Bendigo and several Sire Evaluations Trials in Victoria and New South Wales. We will continue to conduct AI and ET programs and strive to purchase the best genetics possible so that we can pass on increased improvements in productivity to all our clients.

## Comment from Stud Consultant Andrew Calvert

I classed and catalogued the 2020 drop rams late in October and without doubt they are the best group to be offered by Trefusis to date. They display good growth with sound structure standing square and upright on their feet. This combined with productive white nourished water proof wools that have plenty of cut to micron.

The pleasing thing to me is the depth of quality continues to improve and with this in mind we have increased the offering for the On Property Sale to approximately 80 Merino and Poll Merino Rams. An additional 5 have been specially selected for Campbell Town Ram Sale the following week. Further to this clients and potential clients can be re assured there will be a good selection of graded rams available following the Sale.

We certainly recognise the demand for Poll's is increasing and therefore you will see more of these being bred at Trefusis in coming years.

Trefusis has never shirked from bench marking its sheep whether it's in the Show Ring or Sire Evaluation. Furthermore, I would like to commend Georgie for being open minded and prepared to embrace technology and what it has to offer a Merino Stud in the 21st century. No expense is being spared if it is considered beneficial to the product we are trying hard to produce here. Ultimately it's you the clients that in turn will share these benefits.

I have always advocated for a balanced approach when selecting sheep or any breeding animals for that matter. However I also recognise that more and more purchasers today, require solid data to assist with their selections. Stud breeders have a responsibility to see that the data provided has integrity. Studs that are not prepared to do this will simply fall by the wayside!

All Stud Ewes and lambs weaned in the Trefusis Stud are now subject to Genotyping. Whilst there is a lot of work and cost associated with this, clients can be reassured that this will assist enormously with the accuracy of data provided.

The lambs weaned recently from the initial ET programme look very exciting and I look forward to seeing them up the Classing Race in due course. Another program is planned next autumn, giving us the chance to utilise some of the best proven genetics in the country over the very best 10 - 15 Ewes in the Stud.

Well that's about it for me, as I have said previously, I have never seen a better opportunity to make money out sheep, particularly Dual Purpose Merinos! I look forward to catching up with you and as always welcome your comments. It's my pleasure to commend the Trefusis genetics on offer.

Andrew Calvert
